1. Screenshot Preview

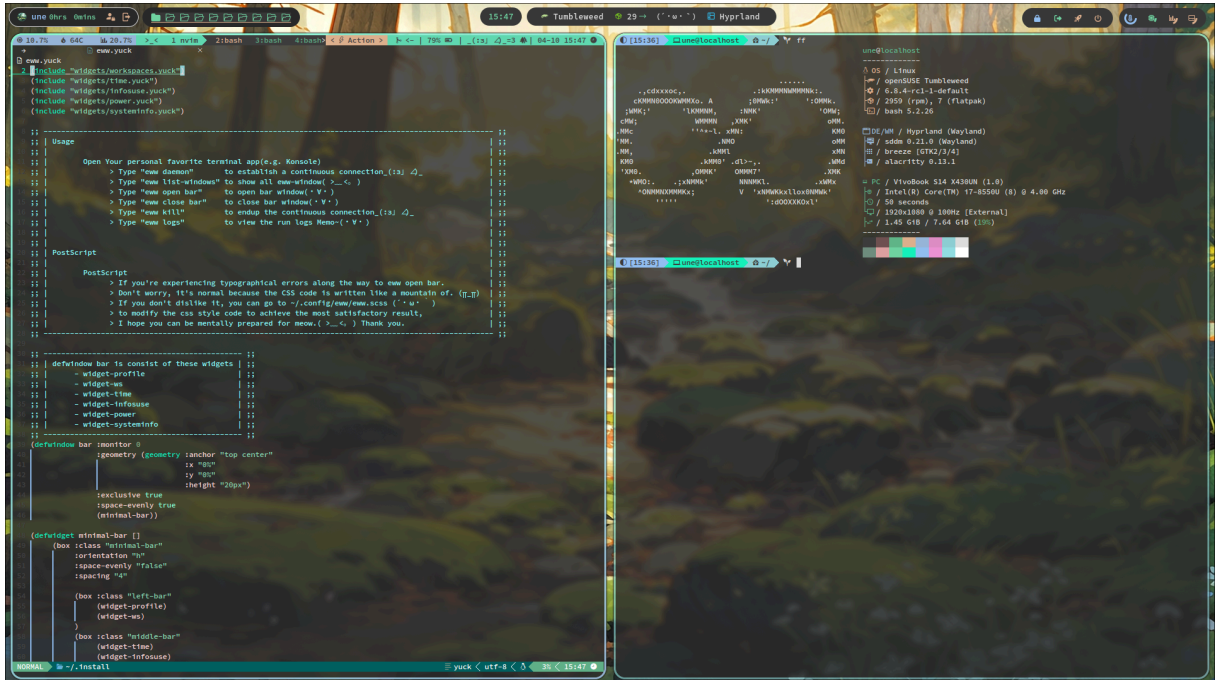

Figure 1: Screenshot Preview 1

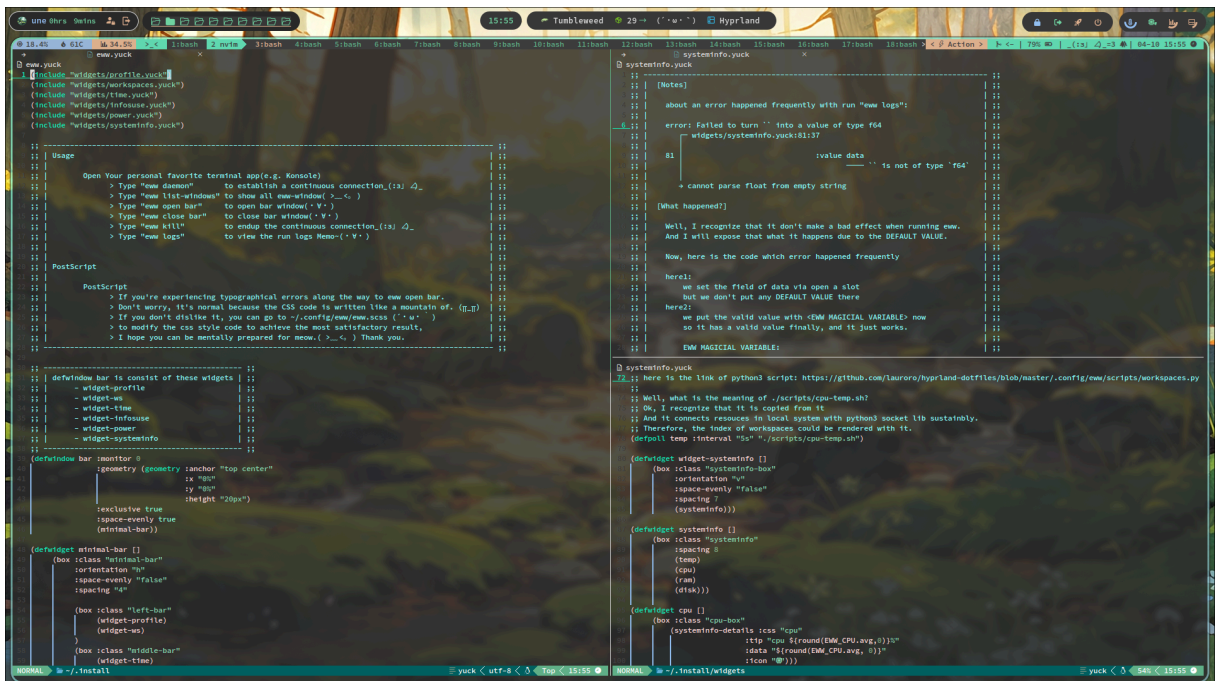

Figure 2: Screenshot Preview 2

2. How to Setup?

2.1 File Structure

```
.  
├─ hyprrland.conf  
├─ wallpaper  
└─ HyprlandAnime.png
```

2.2 Installation

Use the following command to install it.

```
# git clone it.  
git clone https://github.com/kitevnn/dotfiles  
  
# setup configuration file  
cd ~/.config/hypr  
  
# and put the folder of hypr manually here  
  
# OK, done.
```

3. About Usage

3.1 Default Application

num	Description	Default Application
1	Terminal	Konsole
2	Launcher	wofi
3	Screenshot	grim & slurp

3.2 Keybindings

TL;DR;

num	Keybindings	Description	Prerequisite
1	SuperL + Enter	Exec Konsole	KDE plasma 5
2	SuperL + O	Exec Konsole	KDE plasma 5
3	SuperL + X	Kill a window	
4	SuperL + Q	Exit Hyprland wm	
5	SuperL + T	Toggle float	
6	SuperL + N	Toggle split	
7	SuperL + F	Full screen	
8	SuperL + P	pseudo	
9	SuperL + B	Exec firefox	firefox
10	SuperL + M	Exec wofi(drun)	wofi
11	SuperL + A	Take a screenshot	grim, slurp
12	SuperL + W	Let's start resizing window - left for 10 units - down for 10 units - up for 10 units - right for 10 units Let's exit resizing window after pressing - SuperL + W again	
13	SuperL + H	Move focus left	
14	SuperL + J	Move focus down	
15	SuperL + K	Move focus up	
16	SuperL + L	Move focus right	
17	SuperL + 1	Reach workspace 1	
18	SuperL + 2	Reach workspace 2	
19	SuperL + 3	Reach workspace 3	
19	SuperL + 4	Reach workspace 4	
20	SuperL + 5	Reach workspace 5	
21	SuperL + 6	Reach workspace 6	
22	SuperL + 7	Reach workspace 7	

23	SuperL + 8	Reach workspace 8	
24	SuperL + 9	Reach workspace 9	
25	SuperL + 0	Reach workspace 10	
26	SuperL + left	Reach the prev available workspace	
27	SuperL + right	Reach the next available workspace	
28	SuperL + Ctrl + 1	Move a window to workspace 1	
29	SuperL + Ctrl + 2	Move a window to workspace 2	
30	SuperL + Ctrl + 3	Move a window to workspace 3	
31	SuperL + Ctrl + 4	Move a window to workspace 4	
32	SuperL + Ctrl + 5	Move a window to workspace 5	
33	SuperL + Ctrl + 6	Move a window to workspace 6	
34	SuperL + Ctrl + 7	Move a window to workspace 7	
35	SuperL + Ctrl + 8	Move a window to workspace 8	
36	SuperL + Ctrl + 9	Move a window to workspace 9	
37	SuperL + Ctrl + 0	Move a window to workspace 10	
38	SuperL + Ctrl + left	Move a window to prev workspace	
39	SuperL + Ctrl + right	Move a window to next workspace	
40	SuperL + S	Toggle special-temporary workspace	
41	SuperL + Shift + S	Move to workspace	
42	SuperL + mouse_wheel_down	Reach the next available workspace	
43	SuperL + mouse_wheel_up	Reach the prev available workspace	
44	SuperL + mouse_left_button	Drag and change the postition of a window
